ACHIEVEMENTS

- Coordinated international business trips to Abu Dhabi, Saudi Arabia, and Thailand, delivering technical product demonstrations and supporting key client engagements. Led and executed on-site software deployment and optimized system performance based on customer insights, ensuring a high-quality user experience.
- Spearheaded the research and development of an AI-based image recognition model, and successfully integrated it with our company's software solution, contributing to the enhancement of security systems for ICA at Woodlands Checkpoint.

WORK EXPERIENCE

Singapore
06/2023 – Present

Software Engineer
Teleradio Engineering Pte. Ltd.

- Spearheaded the development and maintenance of a standalone application designed to manage and enhance x-ray images captured by our proprietary under-vehicle surveillance systems, ensuring high-quality imaging for security inspections.
- Conceived and implemented new software designs and features to modernise our application, thus improving user experience and operational efficiency.
- Researched and integrated AI-based image recognition models into the software, enabling officers to effectively identify anomalies in x-ray images.

Kuala Lumpur, Malaysia
05/2022 – 08/2022

Full-Stack Web Developer
Antlysis Design Sdn. Bhd.

- Utilised HTML, CSS, and JavaScript to create web pages that accurately reflect the client's design, ensuring compatibility across various devices and screen sizes.
- Ensured the final web pages adhered strictly to the client's design specifications, paying meticulous attention to details such as typography, colour schemes, and layout alignment.

Johor Bahru, Malaysia
03/2020 – 06/2020

Database Administrator
Newpages Network Sdn. Bhd.

- Updated and maintained product stock numbers on the company's website to guarantee accuracy and facilitate real-time inventory tracking.
- Assisted in managing and organising product information within the company's database, ensuring efficient data storage and retrieval.
